Education

Aditya College Of Engineering and Technology

Bachelorin Computer Science - Cgpa-7.27

2022 – 2026

Peddapuram, AndhraPradesh

Narayana Junior College

Board of Intermediate-Mpc - Percentage -76

2020 – 2022

Kakinada, AndhraPradesh

Bhashyam Em High School

Board Of Secondary Education- Percentage -98

2019 – 2020

Kakinada, AndhraPradesh

Projects

Deploy a Web Application Using Docker

October 2024 – November 2024

Using Aws Docker , Html , Css , Javascript

- Docker applies abstraction at the software layer of the operating system to create an instant and portable environment that includes everything
- Docker uses “containers” for its containers. Containers are basically a mechanism for labeling resources with a namespace. For example, an application’s database and all of its files would be stored under a container’s file system namespace.
- Explored ways to visualize and send a daily report of test results to team members using HTML, Javascript, and CSS.

Wheather Report

Jan 2025 – Feb 2025

Using Html , Css , Javascript

- A weather app contains a user input field for the user, which takes the input of the city name. Once the user enters the city name and clicks on the button, then the API Request is been sent to the OpenWeatherMap.
- Create the Weather App UI Structure using the HTML elements like `<div>`, `<h1>`, `<input>` and `<button>`. Embed all the essential CDN links for Icons, Fonts, etc.
- Firstly, we are specifying the API URL of OpenWeatherMap. Then we are specifying the unique API key. By default, the Weather of the Pune location is been shown when the application is loaded.

Intenships

Unified Mentor | DataAnalytics

Febuary 2025 - March 2025

- I had joined the Data analytics Intern for the Big Projects for Gaining Knowledge for this Field
- Data analysis plays a pivotal role in business growth and performance optimization. It aids in enhancing decision-making processes, bolstering risk management strategies, and enriching customer experiences.
- Data analytics finds extensive application in the finance industry, its utility is not confined to this sector alone.

Iship | Aws Development

September 2024 - October 2024

- An Application With Database Using Aws Elastic Beanstack
- You can use Elastic Beanstalk to add a MySQL, PostgreSQL, Oracle, or SQL Server database to an existing environment or a new one when you create it.
- t does this by setting the environment properties for the database hostname, port, user name, password, and database name.

Academor | Webdevelopment

Febuary 2024 - March 2024

- I had Learned the Html , css , Javascript , Bootstarp about having different Knowledge.
- I had created Multiple static Pages for the Small Projects in intenship.
- I had using all the technology to created the webpages.

Certificates

Cisco: cybersecurity , Networking

Nptel: Introduction to IOT

Academor: Web development

Edunet: Ai with machinelearning

Badges: Cloud and Virtualization Concepts ,Hardware and Operating System Essentials,Introduction to Networks

Technical Skills

Languages: C++, Python(Basics), HTML/CSS, JavaScript

Data base: My sql

Other TechnologiesAws Development

Achievements

- I had done 500+ coding problems in Codechef platform.
- I had done 200+ Problems in Greeks for Greeks Platform
